

Requirement Coverage

Documentation ID	Ver.	Date	Description	Changed by
DID016	1.0	11/4/16	Requirement Coverage	Rami

Stage	Role	Name
Author/Lead	QA Lead	Rami
Reviewer	Release Manager/ Product Manager/ Engineering Lead	
Approver	Director QA	

in JIRA

PM create the story in Jira, examining the user scenario expected.

QA create 3 sub task per each story:

- create test plan
- review test plan
- run test plan

sub task for creating test plan contain the link to the Testrail tool which holds the relevant test cases for each test each story

in TestRail

in Testrail, each test case has a field which link to the relevant story in JIRA

using Testrail reports you can create a coverage report to make sure all requirement has test cases which cover them and you can have a visibility on your requirement coverage.
